## PROJECTS

---

### Ashirvad Project

**Technology:** HTML, CSS, JS, C#, MVC, MSSQL

- Developed a website application for the Online Delivery of food products.
- This system was built in .NET Framework. It was a web application which was developed using C# language. All the functionalities for Canteen management were developed. Here, all the student data was managed by SSMS database. There are in all 3 different users: Administrator, Canteen Owner, Students.
- System will also generate reports based on sells of food and members.

### E-Commerce

**Technology:** HTML, CSS, JS, TS, AngularJS, JSON Server

- Users can browse through a list of products, each displayed with details like name, description, price, and image.
- The application includes search and filter functionalities, allowing users to quickly find products based on specific criteria.
- A simplified checkout process allows users to place orders, with the data being sent to and managed by the JSON Server.
